BUREAU OF AGRICULTURAL INTELLIGENCE AND PLANT DISEASES

INTERNATIONAL REVIEW
OF THE SCIENCE
AND PRACTICE OF AGRICULTURE

MONTHLY BULLETIN
OF AGRICULTURAL INTELLIGENCE AND PLANT DISEASES

INDEX 1917

ROME
PRINTING OFFICE OF THE INSTITUTE
1920

THE INTERNATIONAL INSTITUTE OF AGRICULTURE

ORIGIN OF THE INSTITUTE AND SUMMARY OF THE INTERNATIONAL TREATY.

The International Institute of Agriculture was established under the International Treaty of 7 June 1905, which was ratified by forty governments. Seventeen other governments have since adhered to the Institute.

It is a Government institution in which each country is represented by delegates. The Institute is composed of a General Assembly and a Permanent Committee.

The Institute, always confining its attention to the international aspect of the various questions concerned, shall :

(a) collect, study and publish as promptly as possible, statistical technical, or economic information concerning farming, vegetable and animal products, trade in agricultural produce, and the prices prevailing in the various markets ;

(b) communicate the above information as soon as possible to those interested ;

(c) indicate the wages paid for farm work ;

(d) record new diseases of plants which may appear in any part of the world, showing the regions infected, the progress of the diseases, and, if possible, any effective remedies ;

(e) study questions concerning agricultural co-operation, insurance and credit from every point of view ; collect and publish information which might prove of value in the various countries for the organization of agricultural co-operation, insurance and credit ;

(f) submit for the approval of the various governments, if necessary, measures for the protection of the common interests of farmers and for the improvement of their condition, utilizing for this purpose all available sources of information, such as resolutions passed by international or other agricultural congresses and societies, or by scientific and learned bodies, etc.

PERMANENT COMMITTEE OF THE INTERNATIONAL INSTITUTE OF AGRICULTURE

President: Marquis RAFFAELI CAPPELLI, Delegate of Italy.

Vice-President: M. LOUIS-DOP, Delegate of France.

List of the Delegates of the Permanent Committees:

1	ARMENIA	V	Prof. G. CUBONI, Director, Station of Plant Pathology, Rome
2	ARGENTINE REPUBLIC	I	Dr. OSCAR PIERINO SOBRONDO.
3	AUSTRIA	I	Chev. V. DE POZZI, Government Councillor.
4	HUNGARY	I	O. BOLLE.
5	BELGIUM	IV	M. STANCIOFF.
6	BRAZIL	I	M. E. VILLEGAS, Minister Plenipotentiary.
7	BULGARIA	III	WANG-TSUNG-SZE.
8	CHILE	II	DON RUPPO RUFFO, Principe DELLA SCALETTA.
9	CHINA	I	MARCO BRESSO.
10	COLOMBIA	V	M. A. MARTIN RIVERO, Minister Plenipotentiary.
11	COSTA-RICA	V	A. DE OLDENBURG, Chargé d'affaires.
12	CUBA	IV	M. MICHEL VALVERDE, Consul Général.
13	DENMARK	V	LOUIS-DOP, Vice-President of the Institute.
14	ECUADOR	V	LOUIS-DOP.
15	EGYPT	II	LOUIS-DOP.
16	FRANCE	I	LOUIS-DOP.
17	FRENCH WEST AFRICA	V	Dr. T. MUELLER, Privy Councillor.
18	ALGERIA	V	Hon. WILLIAM ERSKINE, Councillor of the Embassy.
19	MADAGASCAR	V	Hon. WILLIAM ERSKINE.
20	MOROCCO	V	Hon. WILLIAM ERSKINE.
21	TUNIS	V	Hon. WILLIAM ERSKINE.
22	GERMANY	I	Hon. WILLIAM ERSKINE.
23	GR. BRITAIN & IRELAND	I	Hon. WILLIAM ERSKINE.
24	AUSTRALIA	III	Hon. WILLIAM ERSKINE.
25	BRITISH INDIA	II	Hon. WILLIAM ERSKINE.
26	CANADA	II	Hon. WILLIAM ERSKINE.
27	MAURITIUS	V	Hon. WILLIAM ERSKINE.
28	NEW ZEALAND	IV	Hon. WILLIAM ERSKINE.
29	UNION OF SOUTH AFRICA	IV	Hon. WILLIAM ERSKINE.
30	GREECE	IV	M. CORNWALL, Minister Plenipotentiary.
31	GUATEMALA	V	C. MONTESOR, Consul General for Guatemala.
32	ITALY	I	Marquis R. CAPPELLI, Vice Pres. of the Ch., Pres. of the Institute.
33	ERITREA & IT. SOMALIA	IV	SHINGOH IMAI, First Secretary of the Embassy
34	TRIPOLI AND CYRENAICA	IV	O. BOLLE, Delegate of Belgium.
35	JAPAN	I	G. VOLPI, Minister Plenipotentiary.
36	LUXEMBOURG	V	Baron W. B. R. de WILDEREN ROEGERS, Minister Plenip.
37	MEXICO	III	Baron W. B. R. de WILDEREN ROEGERS.
38	MONTENEGRO	IV	V. BIANCHI, Consul General.
39	NETHERLANDS	IV	Dr. A. FJELSTAD, Counsellor to the Agricultural Department.
40	DUTCH EAST INDIES	IV	Dr. MEHMET DJEMIL BEY.
41	NICARAGUA	V	A. DEL GALLO Marquis of ROCCAGIOVINE.
42	NORWAY	IV	LOUIS-DOP, Delegate of France.
43	OTTOMAN EMPIRE	I	EUSEBIO LEAO, Minister Plenipotentiary.
44	PARAGUAY	V	DESEBTRIS C. PEREWSKO, Counsellor to the Legation.
45	PERSIA	IV	His Excell. G. G. ZARFELLO Consul General for Russia.
46	PERU	V	A. BIANCHI CAGLIERI, Vice-Consul.
47	PORTUGAL	IV	His Excell. L. LUZZATTI, Minister of State.
48	ROMANIA	I	C. SCOTTI, Consul General for Serbia.
49	RUSSIA	I	FRANCISCO BILBAO SEVILLA, Agricultural Engineer.
50	SAUVADOR	V	Baron C. N. D. DE BELDT, Minister Plenipotentiary.
51	SAN MARINO	V	M. DE PLANTIA, Minister Plenipotentiary.
52	SERBIA	III	DAVID LUDN.
53	SPAIN	I	Dr. E. ROVIRA, Consul.
54	SWEDEN	IV	
55	SWITZERLAND	IV	
56	UNITED STATES	I	
57	URUGUAY	V	

Secretary General: Prof. CARLO DRAGONI.

EDITORIAL STAFF OF THE BUREAU OF AGRICULTURAL INTELLIGENCE AND PLANT DISEASES.

Chief of Section: Dr. JULES MICHEL SAULNIER.

Editors:

Prof. A. BRUTTINI, Chief Rédacteur.
Prof. GIROLAMO AZZI.
THEODORE BIEBLER, Lic. ès Sc. phys. et nat.
Dr. GUIDO BORGHESEANI.
PAUL CARTON, Ing. Agr. et d'Agr. colon.
ALBERT DASCHER, Ing. Agr.

GEORGE H. FORD, M. Sc. (Vict).
Dr. LEO GARRICI.
Dr. FRANCESCO PINAZZOLI.
Dr. GIULIO PROVERAL.
Prof. GIULIO TRANCHIERI.

Translators:

E. MILLICENT POOL M. A. (Liverpool).

ATTILIO RINIERI DE' ROCCHI.

PREFACE

This index, though arranged alphabetically, retains the grouping of the subjects used in the *International Review*. The arrangement of the subjects in each group is in chronological order of publication, except in the case of those relating to Agricultural Development, where the alphabetical arrangement was considered more useful.

Except in the case of the original articles, which are numbered according to their pages, the numbers of each subject refer to the paragraphs in the *International Review*.

The index consists of three parts: one, of the original articles, one concerned only with Agricultural Intelligence and the last with Plant Diseases.

This year there is included the table used for the conversion in the *Review* of the Weights, Measures and Money values of the various countries to the Metric System.

This volume of contents has been prepared by the rédacteur Dr. Giulio Provenzal.

I. — INDEX OF ORIGINAL ARTICLES

II. — AGRICULTURAL INTELLIGENCE

A) INDEX OF SUBJECTS.

- ABACA in the Philippines, 889.
Abacata, *Persea americana*, 449.
Abacaxi, 449.
Aberia caffra, 312.
Abù, 419.
Abrasin, 436.
Abutna legitima, 145.
Acacia: Species Growing in the Botanical Garden of Casa Bianca, Grosseto Province, Italy, 312.
Acarini Collected on Live Stock in the Belgian Congo, 251.
Acetone, 482.
Achioté, 530.
Achira, *Canna edulis*, 530.
Achras Sapota, 449, 530.
Acidimeter, Morizot, for the Rapid Determination of the Acidity of Musts and Wines 1066.
Acids: The commercial Use of Saccharose-Inverting Bacteria for the Manufacture of Lactic Acid, Acetic Acid and Acetone, 482. Effect of Sulphuric Acid Sprays on Sugar Beet, 821.
Adonis aestivalis, 262.
Adansonia digitata, see Baobab.
Adulteration and Fraud: Organisation for the Prevention of Fraud in France, page 319. On the Use of Paraffin Oil as a Substitute for Olive Oil in Sealing Wine Flasks, 368. Separation and Identification of Food Colouring Substances, 403.
Aedes calopus, 891.
Aeschynomene indica, 409.
Africa: Karakul Sheep Breeding in South Africa, 64. The Possibilities of Fodder Plants in South Africa, 147. Oil Producing Plants of French West Africa, 920. Agricultural Development in South Africa, 1112.
Ajaja Ajaja, 188.
Agathis loranthifolia, 443.
Agave, see Sisal.
Agraz, 530.
Agricultural Botany, see Chemistry and Plant Physiology.
Agricultural Education: The First Agricultural Demonstration Trains in Russia, 3. The First 37 Years of the Royal Hungarian School for « Maltres d'eau » at Kassa (1879-1916), 217. The Foundation of a National School of Veterinary Medicine in Mexico, 218. The First School of Mechanical Cultivation founded Germany; 303. Agricultural Education in Canada, 398, 402. Courses of Practical Agricul-

- tural Engineering in Italy and France, 519. School for Farmers at the Royal Colonial Garden of Palermo, 520. The Maple Sugar and Syrup Industry Schools of Quebec Province in Canada, 792. Forestry Instruction in Sweden, page 1460.
- Agricultural Improvements:** Water Penetration in the "Gumbo" Soils of the Bellefourche Reclamation Project South Dakota, United States, 222. Draining and Cultivation of the Poitevin Marsh, France, 223. The Irrigation Canal of the Pusztta Hortobagy in Hungary, 308. "Navazos" and their Use for Fixing Sandhills in the Province of Caliz, Spain, 309. The Use of Dog's Tooth Grass (*Cynodon Dactylon*) for Binding Shifting Lands in Sicily, 525. Investigations in Cost and Methods of Clearing Land, 899. Cultural Experiments in Mangrove Plantations in Madagascar, 998.
- Agricultural Institutions:** The Volunteer Cooperators of the U. S. Department of Agriculture for the Advancement of Farming, 4. The Organisation of the Agricultural Department in the Belgian Congo, page 177. The Activity of the Various Technical Branches of the Agricultural Administration of Tunis, 219.
- Agricultural Research and Experiment Stations:** Eala Botanical Garden, page 179. Experimental Farm of Munama (Katanga), page 179. Recent Researches of the Imperial Institute on: Fibres from the Belgian Congo; the Pineapple as Fruit and Fibre Producer; Ceara Rubber from *Manihot Glaziovii* in Nigeria; the Essential Oil from the Tubers of *Kaempferia Elthelae*; The Essential Oil of *Cymbopogon flexuosus*, 118. Experimental Kelp Plant at Summerland California, 123. The Station of Forestry Research in Denmark, 618. Agricultural Experimentation in the Argentine Republic, 702. Farming Practice in the Sand Hills Section of Nebraska, 893. The Experimental Plantations of Vallombrosa, Italy, 923.
- Agrimotor**, Crawley, 942.
- Agropyron* sp., 18.
- Agrostis vulgaris*, 258.
- Aibizzia Lebbeck*, 36.
- Albizzia moluccana*, 804.
- Alcohol: Sugar Sorghum and Alcohol in War Time, 369. Fuel Alcohol in Australia, 1058.
- Aleurites* spp., 436.
- Allaha, see Lucerne.
- Algarrobo, 530.
- Algeria: The Present State of the Livestock Industry, page 1. Cotton Growing Prospects, 243. The International Trade in Feeding Stuffs, pag. 489. Observations on Manitoba Wheat, 1017.
- Allium vineale*, 281.

- Vine growing: Plants Introduced into the United States, 18. Drought resisting Stocks in Hérault, France, 47. "Bellaverga", a good Italian Table Grape, 48. A Simple Apparatus for Clearing Vines, 73. Experiments with New Grape Stocks at the Montpellier National School of Agriculture, France, 156. Good Hybrid Direct Bearers Cultivated in France, 252. The Chemical Composition of American Grapes in the Central and Eastern States, 253. Variations of a Sexual Hybrid of the Vine obtained by Grafting it on one of its Parents, 324. Hybrid Direct Bearers in the Côtes du Rhône Region, France, in 1916, 336. The Slow Change of Vine Wood Buried in the Soil, 414. The Yield of Unpruned Vines, 452. Stocks Tested at the National School of Agriculture, Montpellier, France, 453. Effect of the Sitoecco upon Tunisian Vineyards, 490. In Uruguay, 517. Fruit varieties for Maine, 637. Shallow Cultivation in Vineyards, 640. Cultivation of the Vine by the Desbois Method, 641. Observations on the Cultivation of the Vine "en Asmas", in Bulgaria, 642. Notes on Hybrid Direct Bearers in the Seine-et-Marne District, France, 731. Mechanical Methods of Cultivation of Vineyards, 841. Grape-Henry, 857.

The Improvement of Native Vines by Crossing and Selection in the United States, 1015. Observations on some Direct Bearers, in France, 1026. Table Grape Hybrid Bearers, 1169. Hybrid Direct Bearers in the Seine-et-Marne District, France, in 1917, 1170. The "Madone" Vine in the Department of Aude, France, in 1917, 1171.
 Viper's Grass in Feeding the Mulberry Silkworm, 1195.
Ulmia latifolia, 530.

WALNUT: In the United States, 18. The Improvement of the Walnut by Selection in California, 138. The Walnut Tree and the Pecan Nut Tree, 555. The Acreage of Fruits, Bearing and Non-bearing by Counties in California, 729.
 Water used the Plants, 23.
 Water, Rain, 582.
 Water, Sewage, 14.
 Weizenmehlkleie, 505.
 Wheat: Seeds and Plants Introduced into the United States, 18. Work on Egyptian Wheats in 1915, 29. Wheat-land in the Republic of San Salvador, Central America, 30. Agricultural Development of the Province of Ontario, Canada, 117. "Fylgia", "Extra Squarthead III", "Sol II", "Pansai", "Thule II", Varieties of Wheat selected at Sealöf, Sweden, 135. Cultural Trials of Some Native and Foreign Wheats at Pharsalos, Thessaly, 140. The Distribution of Crops in the United States, 215. Effect of Meteorological Factors on the Germinating Capacity of Seeds, 220. Effect of Sodium Salts in Water Cultures on the Absorption of Plant Food by Wheat Seedlings, 229. Improvement of Ghirka Spring Wheat in Yield and Quantity, 237. Trials of Foreign Varieties of Wheat in Spain,

238. Net Energy Values for Ruminants, 258. Trailer for Men who have lost a Leg, 270. The Effects of Manganese and Iron on the Growth of Wheat, 319. The Suppression of Characters on Crossing, 320. Varieties of Hungarian Wheat Selected to Increase the National Production, 325. Manitoba Wheat in Italy and France, 326. Agricultural Procedures for Increasing the Production of Wheat, 327. Cereal Experiments in Montana and in Wyoming, United States, 328. New Practical and Scientific Experiments in the Selection of German Wheats Rich in Gluten, 420. A New Method of Wheat Cultivation Advocated by Mr. Devaux, 428. Results of Experiments in the Cultivation of Spring Wheats at Valdichiana, Tuscany, Italy, 429. The Importance of the Awns of Native Wheat in Hungary and of Barley in Sweden, 430. Agriculture in Uruguay, 517. The Use of Lead for Stimulating Growth in Plants; Manuring Experiments in Germany, 529. Experiments with Spring Cereals at the Eastern Oregon Dry-Farming Substation, Moro, Oregon, 540. Studies on Wheat in the Province of Rovigo, Italy, 541. Is Lysine the Limiting Amino-acid in the Proteins of Wheat, Maize or Oats?, 508. Wheat Production in Canada, 222-600. Dry Farmed and Irrigated Wheat, 632. The Effect of Soil Moisture Content on Certain Factors in Wheat Production, 705. Belotourka, Richlie and Oregon, Good Varieties of Chili, 724. The Agricultural Development of North-West India, 700. The Resistance of Wheat to Cold in Relation to its Sugar Content; Investigations carried out in Sweden, 800. Selection of Spring Wheat in Sweden, 800.

Hybridisation Tests between Spelt and Wheat in Holland, 807. Experiments in Hybridizing Wheat and Rye in the United States, 808. Performance Record of Irrigated Wheats, 810. Cost Prices and Unit Yields of Wheat in the Argentine, 811. Dry Farming Investigations at the Sherman County Branch Experiments Station, 901. The Cultivation of Wheat by Hoeing, 914. Wheat Production in the Argentine, 1016. Observations on Manitoba Wheat in Algeria in 1917, 1017. The Cultivation of Wheat by Early Sowing and Hilling-up, 1145. Cultural Experiments with Different Varieties of Wheat at Ultuna, Sweden, 1146, 1147. Red Fife Wheat in the South-West of France, 1148. The Most Favourable Times for Sowing Wheat and Rye at Alnarp, Sweden, 1149.

Wild Cotton, *Hibiscus* sp., 149.

Wild Rattleford, 1126.

Wili-Wili, *Eriohima monosperma*, 559.

Wine-making : Apparatus for Sulphuring Musts and Wines on a Large Scale by Sulphur Dioxide produced directly by Burning Sulphur, 75. A Simple Apparatus for Filtering Wine-ices, 76. A Contribution to the Study of the Yeasts of Wine, 85. The Relationship Between the Development of the Flowers of Wine and the Watering of Wine, 86. The Analysis of Hungarian Wines and the Minimum and Maximum Content of their Principal Constituents, 87. Practical Method for Removing the Foxy Flavour from Noah Grapes, 183. Method for the Investigation of the Aniline Derivatives and other Foreign Colours in Wine, 278. Variations in the Glucometric Index of Musts coming from the Same Vines in Different Years, 366. On the " Casse blan-

che " of Wines, 367. On the Use of Paraffin Oil as a Substitute for Olive Oil in Sealing Wine Flasks, 368. New Feeding-Staffs used in Germany during the War, 565. Experiments on the Deacidification of Wine, in Italy, 666. The Reduction in Volume of Wine due to Fermentation, 667. Contribution to the Study of Apiculated Yeast, 668. Notes on Hybrid Direct Bearer in the Seine-et-Marne District France, 731. A New Apparatus for Pasteurising Wine in the Cold, 745. The Use of Metabisulphite of Potassium and Sodium in Wine-Making, 766. Contribution to the Study of the Aldehydes of Wine, 817. Contribution to the Study of Bitter Wines, 848. " Grape Honey " 857. Plastering of Grapes and the Increase of Acidity and Sulphate in the Wine : Investigations : Italy, 1063. Wine Making Experiments with Sulphur Dioxide : Italy, 1064. The Substitution of Calcium Sulphite for Potassium Metabisulphite in Wine-Making, 1065. Morizot Acidimeter for the Rapid Determination of the Acidity of Musts and Wines, 1066. Unripe Grapes in Wine Making in the Argentine, 1215. The Reduction in Volume of the Must During Fermentation, 1216. Contribution to the Study and Treatment of the " Casse Blanche " Wines, 1217.

Withering : On the Resistance of Plants to Withering, 227.

Wool : Exports from Algeria, *passim*. Hereditary Transmission of the " Curly Wool " Character of Karakul Sheep in Crosses between Karakul and Rambouillet Breeds, 570. In Queensland, 700. Cat Breeding in the Argentine Republic at the Present Day, *page* 1073. P

- sent state of Sheep Breeding in Canada, *page* 33 .

- Aegle Marmelos*, 107.
- Aegopodium Podagraria*, 382.
- Aeschynomene sensitiva*, 607.
- Althognatus ater*, 783.
- Africa: New Uredinaceae in East Africa, 193. *Bacterium campestre*, Injurious to Crucifers Cultivated in South Africa, 201. New Species of Coccid-Infesting Chalcids on the Gold Coast and in Southern Nigeria (Africa), 302. *Ceratitis cosyra* and *C. capitata*, Diptera Injurious to Fruit Trees in South Africa, 513. Fungi of Angola, 651. Notes on Coccid-Infesting Chalcidoidea, 783. Chalcidoidea Living in the Fruits of Wild Fig-trees, 59. Observations on the Coccidae of Europe, Africa, and America, 977. Fruit Flies (Sub-Genera *Trypoxys* and *Dicus*), observed in Erythraea, Nyasaland and Mauritius, 979. Nigerian Fungi, 1085. Observations on the Coccidae of Asia, Africa and America, 1090. Insects Injurious to the Cacao Plant in the Belgian Congo and Natal, 1107. Insects Injurious to Cultivated Plants in North Africa, 1252.
- Azave sisalana*, 607.
- Agelaius icterocephalus*, 1264.
- Agrilus burkei* n. sp., a Coleoptera Parasitic on *Alnus rhombifolia* and *A. tenuifolia* in California, 887.
- Agriolimnaea agrestis*, 1084.
- Agriotes*: *A. lineatus* and *A. obscurus*

- on seedling sugar-beets, 111. *A. lineatus* in Denmark, 1084. Observations on the Life History of *Agriotes obscurus* Linn. 508. Diseases observed in Austria-Hungary during 1915, 112.
- Agromyza* spp., 785, 787, 1109.
- Agrotis exclamationis*, 205.
- Agrotis segetum* Observed in Austria-Hungary during 1915, 112. Damaged cabbages and turnips, 205.
- A. segetum* and *A. exclamationis* on Tobacco in Ireland, 205. *A. segetum* in Russia, 611. *A. segetum* in Denmark, 1084.
- Agriate, *Persea gratissima* attacked by Coccidae of Porto Rico, 607.
- Atheris* n. spp. 977, 1100.
- Alang-alang, *Imperata arundinacea*, 914.
- Albizia moluccana* attacked by *Helicopeltis*, 614. Attacked by the Coccidae of Africa, 977.
- Andes frenatus*, a Coleopteron Injurious to the Mango-tree, in Bengal, 212.
- Andes theobromae*, 1107.
- Andes triloba* attacked by *Septobasidium bogoriense*, 808.
- Aneides destructor*, 604.
- Angrubus*, *Hymenaea Courbaid*, 607.
- Ugeria: Insects Injurious to Cultivated Plants, 1252.
- Enom*: New Japanese Fungi, 905.
- Amacigo, *Elaphrium Samamba*, 607.
- Amendra, *Terminalia Catappa*, 607.
- Almond: Observation on Plant Diseases carried out in 1915 at the Royal Institute of Cryptogamic Botany of Pavia, Italy, 381. "Little Leaf" on almond in California, 1241.
- Enus* spp., 887.
- Anacanthus potalis*, 382.
- Anchrobia trinda*, 885.
- Anelanchieris* attacked by *Phymopsis Anelanchieris*, 904. *A.* attacked by *Agromyza*, 1109.
- America: On the Hibernation and Spread of Cereal "Ruots" in Sub-tropical Climates, 97. Observations on the Coccidae of Asia, Africa and America, 1099.
- Anami, *Pavonia typhalaea*, 607.
- Andropogon*: *A. Sorghum* attacked by *Chaelodacus*, spp. 107.
- Anemone nemorosa*, 382.
- Aneristus ceroplastae* How., 507.
- Aneristus croconatus*, 392.
- Angitia phutella*, 882.
- Angola, see Africa.
- Annato, 607.
- Anoma*: Coccidae of Porto Rico, 607.
- Coccidae of the Philippine Islands, 1253.
- Ant: The "Gramang" Ant from the Point of View of its Economic Importance, 507, 156. The Ant in the control of Pests of the Coconut-tree, 1256, 1259.
- Anthomyia conformis*, 112.
- Anthomyia grandis* in the United States, 39.
- Anthraxose of Bean and of Pea, 100.
- Anthurium azaleae*, 607.
- Anticarsia Bunnus*, 1253.
- Antigonon leptopus*, 1253.
- Antilles: Root Diseases Due to *Rosellinia* sp., in the Lesser Antilles, 509.
- New Mites, Mostly Economic Arach. Acar., 781. *Physothrips vanthius* sp. nov., a New Thysanopteron Damaging Cultivated Orchids (Cattleya) in Trinidad, West Indies, 684.
- Cotton Plants as Green Manure: a Method of Controlling the Mite *Eriothrips caryocyn* and the Scale Insect *Aspidiotus nigra* in the Island of St. Kitts, Lesser Antilles, 1102.
- Willistoniana eximius*, a Tachinid Parasite of the Lepidopteron *Automeris janus* in the Island of Trinidad, Antilles, 1257.
- Automeris janus* a Lepidopteron Living on Cacao and on *Erythrina* spp. in

- the Island of Trinidad, Antilles, 1260. *Agelaius icterocephalus*, a Bird Injurious to Rice in the Island of Trinidad (Antilles). 1263.
- Anthrips aculeata*, 1084.
- Aonidiella perniciosus*, 206.
- Apanteles* parasite of *Notarcha*, 211.
- Aphis*: *A. avenae* injurious to Oat 205, 206, 1084. *A. brassicae*, 1084. *A. papaveris*, in Hungary, 112. *A. pomi* and *A. avenae* in Canada, 206. *Aphis pruni*, on *Prunus*, in Ireland, 205.
- Aplanobacter Rathayi*, 1084, 1093.
- Apocrypta westwodi*, 301.
- Apple scab, 1086, 1227.
- Apples: *Tropidaris wipkes*, *Palomena prasina*, *Phyllopertha horticola*, *Smerinthus ocellatus*, *Lyovetia clerkella*, *Bibio* sp. injurious to apple trees, 205. The Effect of Hydrocyanic Gas Fumigation on the Eggs of *Aphis pomi* and *A. avenae*, Apple Parasites in Ontario, 206. *Phenacoccus aceris* on the apple trees in Hungary, 213. Observations on Plant Diseases carried out in 1913 at the Royal Institute of Cryptogamic Botany of Pavia, Italy, 381. *Nylaria* sp., the Cause of Root-Rot of the Apple in Virginia, United States, 604. Influence of Temperature on the Development of Fungi causing Rot in Stored Potatoes, 776. Notes on the Black Apple Leaf-Hopper (*Idiocerus fitchii*), 788. *Nylaria* sp., the cause of Root Rot in Apple Trees in North Carolina, United States, 875. Over-Wintering of the Apple-Scab Fungus, *Venturia inaequalis*, in Canada, 1087. *Venturia Poni* in the United States, 1227.
- Apricots: Observations on Plant Diseases carried out in 1913 at the Royal Institute of Cryptogamic Botany (Cryptogamic Laboratory) of Pavia, Italy, 381. The "Little Leaf" Disease of the Apricot in California, 1231.
- Arachides: Pea-nut Mosaic, 192. Cicadidae of the Philippine Islands, 1253.
- Araucocerus fasciculatus*, a Coleopteron injurious to *Tephrosia candida*, 1259.
- Aralia*: Host plants of *Thielavia basicola*, 292. *Lecanium persicum* on leaves of *Aralia*, 973.
- Arctostaphylos alpina*, 385.
- Ardisia humilis*, 976.
- Areca catechu*, 696, 993.
- Areca lutescens*, 607.
- Arenga saccharifera*, 1253.
- Argentina: *Mesolecanium delticum* n. sp. a Gall-forming Scale Insect observed upon Species of Citrus, 78. The Natural Enemies of the Macrolepidopteron *Oreotus platensis* ("Elcho de canasto") attacking Tree in the Argentine, 681. *Leucaspis* pin: a Coccid Attacking Pines in the Argentine, 687. Fungous Diseases of Wheat in the Argentine, 1092. Animal Pests of Wheat in Argentina, 1249.
- Aspilota mellea*, 680, 1249.
- Arrenophagus chionaspis*, 607, 110.
- Arrowroot attacked by *Rosella* spp., 650.
- Arsenite: An Experiment of spraying the *Cassida pallidula* with 12% solution of arsenate of lead and arsenite of zinc, 297. Arsenate of Lead against *Ceratitis carya*, 51. Arsenate of Lead against *Chalcidius carya*, 613. *Phyllosticta moricariae*, 787. Arsenate of Lead against *Eudemis* and *Cochylis*, 88. *Plutella maculipennis* controlled by arsenical sprays, 882. *Meligethes aeneus*, a Coleopteron Injurious to Cruciferae in Sweden, 1100.
- Artemisia spinescens*, 701.
- Arthrolobium*, 133.
- Arthropodium diversifolium*, 114.
- Artocarpus* spp. attacked by *Coccid*

- dae in the Philippine Islands, 1233.
- Arioglyphus integrifolia* attacked by *Chaetodacus ferrugineus incisus*, 107. Attacked by *Pleurotus radi-cosus*, n. sp., 868.
- Arundo Donax*, 681.
- Asclepias curassavica*, 781.
- Aschochyta: A. Brassicae*, 503. *A. hortol-um*, 680. *A. Pisi*, 100. *A. sp.*, the Cause of a Disease of Cabbages, 593.
- Aseria variegata*, 1107.
- Asia: Observations on the Coccidae on the Asia, Africa and America, 1090.
- Asparagus falcatus*, 970.
- Asparagus Sprengeri*, 607.
- Asparagus* variety resistant to rust 824.
- A. fergillus parasiticus*, 509.
- Asperula odorata*, 382.
- Aspidiophagus citrinus*, 607, 783.
- Aspidius: A. (Chrysomphalus)*, an-ter on the leaves of the coconut palm, 100. *A. bromeliae*, 106. *A. camelliae*, 783. *A. cyathophylli*, 607. *A. destructor*, 607. *A. dictyospermi* *pumiliter*, 100. *A. perniciosus*, 200. *A. spp.*, 607. Coccidae Ob-served in the Royal Botanic Gar-dens Kew, England, 976. Coccidae Observed in South Africa, 977. In British Guiana, 1100. In the Phi-lippines, 1233.
- Aspidioproctus* spp, 1090.
- Asplenium nidus*, 1253.
- Astra, against *Plasmopara vitis*, 194.
- Aster subulatus*, 600.
- Aster-lecanium: A. bambusae*, 976. *A. spectabile*, 1009. *A. spp.* in Porto Rico, 607. Coccidae ob-served in the Seychelles Islands, 100.
- Atriplex* attacked by *Lita atriplex-ella*, 112.
- Atmosphere: On the Hibernation and Spread of Cereal Rusts in Sub-tropical Climates, 97. Relation be-tween Climate and Life-Cycle of the Tussock Moth (*Liparis monacha*, = *Lymantria monacha*), 782. At-mospheric-Electricity and damage of Hevea, 985. Hop resistant to diseases and bad seasons, 1142. Winter Wheat, 1146, 1147.
- Aucuba japonica*, 681.
- Aulacaspis pentagona*, 607.
- Aulacaspis rosae*, 1253.
- Australia: *Plantago Psyllium*, a New Weed in South Australia, 605. *Scorzo-nera laciniata*, a New Weed in Southern Australia, 780.
- Austria-Hungary: Diseases and Pests of the Sugar-beet observed in Au-stria-Hungary during 1915, 112. Comparative Tests of Remedies against Vine Mildew (*Plasmopara viticola*), in Austria in 1916, 194. Scale Insects as Vine Pests and their Relationships with other cultivat-ed Plants, 213. The Defective Development of Walnut Shells in Austria, 291. *Synchytrium* in Hun-gary, 294. *Microgaster glomeratus*, a Braconid Observed on Wheat in Austria, 296. Experiments Made in Austria in Protecting Forest Trees (es-pecially Resinous Kinds) from In-jury by Game, 302. *Pseudococcus nipae* (= *Dactylopius nipae*), a Scale Insect Injurious to Palms, in Hungary, 615. *Coelodes julti-ginosus*, a Coleopteron Injurious to the Poppy, in Austria, 693. Rela-tion Between Climate and Life-Cycle of the Tussock Moth (*Liparis monacha*=*Lymantria monacha*) in Bohemia, 782.
- Automeris janus*, 1287, 1260.
- Avicennia nitida*, 977, 1099.
- Awali*, 614.
- Aximopsis javensis*, 1259.
- Azalea attacked by *Stephanitis vioides*, 1098.
- Azeca schimperi*, 1100.

- ACCHARIS VIMINEA*, 701.
acillus: *C. carotovorus*, 1089. *B. Lymantriae* and *B. Liparis*, n. sp., 610.
B. Omelianskii n. sp., as the Cause of „Bacillary Gummosis” of Sorghum, 102. *B. Solanacearum*, 680.
Bacteria on Cultivated Plants: Bacteria and Fungi in Their Vital Relationship with the Tissues of Plants, 493. Fungi and Bacteria as a Means of Combating Insects Injurious to the Sugar Cane, 509. Bacteria and Fungi Parasitic on Cultivated Plants, Observed in 1915 in the Province of Turin and Neighbourhood, 680.
Bacterium: *B. campestre*, Injurious to Crucifers Cultivated in South Africa, 201; *B. citrarefaciens*, 972. *B. Phaseoli*, 874. *B. Pruni*, 1096. *B. Pyty-mysi*, 396. *B. Tabacum*, in North Carolina, 1244. *B. vascularum*, 962.
Bael, *Agla Marmelos*, 107.
Bamboo: Coccidae of Porto Rico, 607. Bamboo attacked by *Helopeltis* spp., 614. *Bambusa Metake*, 781.
Bananas: On a Disease of the Banana in the Saley Islands, Indian Archipelago, 190. *Notarcha (Nucleia) oclasma*, a Microlepidopteron Injurious to the Banana, in Java, 211. Coccidae of Porto Rico, 607. Coccidae in the Philippine Islands, 1253.
Barbadoes: *Dinaspis annae* n. sp. on *Citrus*, 608.
Barbarea vulgaris, 382.
Barley: Uspulum a New Preparation for the treatment of Cereal grains against Fungoid diseases, 100. *Contarinia tritici*, a Dipteron Injurious to Wheat and Barley in Sweden, 692. On the Specific susceptibility of Barley to Leaf Stripe Disease (*Helmithosporium graminum*), 777. *Tetanoblia decepta* on barley, 781. *Hordeum trifurcatum* attacked by *Mycosphaerella Lorth-cola*, 965. *Ustilago nuda* and *U. Trilicci*. Observed Respectively on Barley and Wheat in Java, 979. Fungi, Insects and Animals Injurious to cultivated Plants in Denmark, 1084. *Blitophaga opaca*, a Coleopteron Injurious to Barley, Beets and Potatoes in the Scandinavian Peninsula, 1004. Mites Attacking Orchard in United States, 1168.
Bean: Uspulum, a New Preparation for the treatment of Cereal Grains against Fungoid Diseases, 100. Host Plants of *Thielavia basicola*, 292. *Nezara viridula*, a Rhyncote Pest of the Tomato the French Bean and the Potato in New South Wales 298. Attacked by *Sclerotinia Lenticiana* and *Colletotrichum Lindemuthianum* in 1915, Italy, 381. In Africa, 4681. *Bacterium Phaseoli* injurious to Field Beans in Michigan U. S. A. 874.
Begoniaceae: Host Plants of *Thielavia basicola*, 292.
Beni bana, 965.
Berengena cimarona, *Solanum* 607.
Beta maritima, attacked by *Lathrolella*, 112.
Betula alba attacked by *Leeuwenzebrinum*, 975.
Bibio, *B. abbreviatus*, a Dipteron Injurious to Celery in Alberta Canada, 512. *B. hortulanus*, 1084. *Bibio* sp., 205.
Bicho de canasto, 981.
Bignoniaceae: Host Plants of *Thielavia basicola*, 292.
Bindweed prominent, 884.
Biosteres carpomyiae an endoparasite of *Carpomyia vesuviana* 115.
Birds: *Vanellus vanellus*, *Larus*, *C. frugilegus*, *C. monedula*, *Sturna vulgaris* against *Agriotes obscurus* 508. The Squirrel! as an Enemy

- of Forest Plants and of Birds, 516.
Bixa Orellana, 607.
Blaberus discoidalis, 1098.
 Black apple leaf-hopper, 788.
 Black knot, *Plowrightia morbosa*, 825.
 Black rot of Chestnuts in Italy, 203.
 Black rot of cruciferous plants, 201.
 Black scab, 294.
 Black scale, 1102.
Blatophaga spp., 391, 886.
Blighia sapida attacked by *Lecanium subhirsutum*, 997.
Blatophaga opaca, 1104.
Blumea balsamifera, 1253.
 Bohemia see Austria-Hungary.
 Bombyx, Unlike, *Lymantria dispar*, 610.
 Bordeaux Mixture see Prevention and control.
 Bosna, against *Plasmodium viticola*, 194.
 Berytis: *B. anthophila*, on the clover in Russia, 190. *B. cinerea*, a Disease Attacking the Shoots and Fruit of Fig Trees in England, 202. Resistance to *B. cinerea*, 731. *B. vulgaris* in Italy, 381.
Bougainvillea spectabilis, 681.
Brachycautha *tor-punctata*, 1100.
Bracon fletcheri an ectophagous, parasite of the larva *Carpomyia ceratana*, 115.
 Brassica: *B. campestris* var. *Rapa* and var. *Rutabaga* attacked by *Plutella maculipennis* and by *Agrotis segetum*, 205. *B. oleracea*, 382. *Brassica* spp. attacked by *Bacterium campestris*, 201.
Bremia Lactuce on *Lactuca sativa*, *Lapsana communis*, *Sanctus oleraceus* and *Senecio vulgaris* in the Province of Pisa, 382.
Bromelia Pinguin, 607.
 Brown: The Noxious Action of Sea salt, 96.

- Cassia occidentalis*, 1259.
- Cassida pallidula*, 297.
- Casso, *Saccharum spontaneum*, 611.
- Castanea mollissima*, a Chinese Chestnut-tree Resistant to *Endothia parasitica*, 18, 99.
- Castillon: Coccidae of Porto Rico, 607.
- Castor-oil Plant: *Ricinus* attacked by *Chaetodacus* spp. in India, 107. Coccidae of Porto Rico, 607. New Japanese Fungi, 965. Rust (*Uromyces*) of the Castor-oil Plant in Morocco, 1245.
- Catsear, 389.
- Cats Heads, 204.
- Cattle, 984.
- Cecidomyia* sp., 978.
- Celery: *Phaedon tumidulus* and *Psila rosae* on Celery in Ireland, 205. Attacked in 1915 by *Septoria Aphi* in Italy, 381. *Bibio abbreviatus* a Dipteron Injurious in Canada, 51.
- Coccidae of Porto Rico, 607.
- Celtis australis*, 680, 681.
- Celtis occidentalis*, 885.
- Celtis philippinensis*, 1253.
- Centauria solstitialis*, 689.

- Cephaleurus virescens*, 978.
Cephalosporium Lecanii, 697, 1169.
Cerapterocerius pattersoni parasite of *Vinsonia personata*, 392.
Cerastium glomeratum, 382.
Cerasus Laurocerasus, host of *Lecanium capreae*, 975.
Ceratitis: *C. capitata* on Citrus fruits in North Africa, 1252. *C. cosyra* and *C. capitata*, Diptera Injurious to Fruit Trees in South Africa, 513.
Ceratomyza femoralis, 785.
Cerauphyllus, 396.
Ceratosolen spp., 301, 886.
Cercis canadensis, 885.
Cerospora personata, 392.
Cereals: On the Hibernation and Spread of Cereal Rusts in Subtropical Climates, 97. *Eupulum*, a New Preparation for the Treatment of Cereal Grains against Fungoid Diseases, 100. A New grain standardization laboratory in Minnesota, United States, 213. The Influence on Germination of the Hot Water Treatment of Cereal Seeds for Smut, 533. On the Appearance of *Puccinia glumarum* Yellow Rust on Wheat in 1913 and 1916 in Germany, 597.
Cereus attacked by *Diaspis echinocacti*, 976.
Cerophala longicera, 308.
Cerodonta femoralis ("wheat-sheath miner"), a Dipterous Pest of Wheat, 785.
Ceroplastes: *C. nemosae*, 612. *C. rosea*, 975. *Ceroplastes* spp., 1099, 1100, 1253. Coccidae observed in the Seychelles Islands, 106. Coccidae of Porto Rico, 607.
Chalcophrynus assimilis, and *C. quadricolor*, 1084.
Ceylon Fruit Flies, 107. Chalcididae on the Wild Fig-Tree in Ceylon, 301. *Rhynchophorus ferrugineus*, a Coleopteron Injurious to the Coconut and other Palms in Ceylon, 696. Notes on Coccid-Infesting Chalcidoidea, 783.
Chaetocnema ectypa ("the desert corn flea-beetle") a Coleopteron Parasitic on Cultivated Gramineae and Lucerne, in the United States, 613.
Chaetococcus bambusae, 697.
Chaetodactylus spp. in India, Burma and Ceylon, 107.
Chalaropsis thebaicae, n. g., and n. sp. a Parasite of the White Lupin in Latium, 293.
Chalcididae: *Dibrachys* a Chalcid Parasite of the "Grain Weevil", 108. Chalcididae of the Wild Fig-Tree in India, Ceylon and Java, 391. New Species of Coccid-Infesting Chalcids on the Gold Coast and in Southern Nigeria (Africa), 392. *Wolfiella ruforum*, 393. Notes on Coccid-Infesting Chalcidoidea, 783. Chalcididae living in the fruits of Wild Fig trees in Eritrea and Uganda, 886.
Chamaecrops humilis, 681.
Cheloneuromyza narensis, 507.
Cheimachia brumata dangerous to *Rhododendron*, 245.
Cheiranthus Cheiri, 382.
Chenopodiaceae: Host Plants of *Phlebotomus*, 292.
Chenopodium attacked by *Lila atriplicella*, 112.
Chenopodium album, 501.
Chenopodium murale, 382.
Chermes abietis, 505.
Cherry: Myxomycetes and Fungi of Piedmont, Italy, 1233.
Chestnut: A Chinese Chestnut-tree Resistant to *Endothia parasitica*, 99. On the Black Rot ("Nerume" or "Marcume nero" of Chestnuts, in Italy, 203. *Phenacoccus aceris* observed on the wild chestnuts, 213. New Observations on the "Ink Disease" of the Chestnut Tree in Italy, 387. *Phoma endogeni* a Sphaeropsid Parasite of the Chest-

- nut in Piedmont, 687. Studies on the "Ink Disease" of the Chestnut tree in Italy, 973. The Chinese Chestnut, 1129.
- Chile: *Lepidosaphes diaspidiiformis* n. sp. on *Myrcogenia planipes*, 608.
- Chilocorus bipustulatus*, 691.
- Chilocorus melanophthalmus* Mols., 507.
- Chiloneurus afer* and *Chil. evanotus*, 392.
- Chionaspis*: Coccidae in Seychelles Islands, 106. Coccidae of Porto Rico, 607. *Chionaspis*, spp. 783, 917.
- Chilly, see *Capsicum*.
- Chlorophenate of mercury content in Uspulium, 100.
- Chlorops taeniopus*, 1048.
- Chlorosis, Toxic, of Maize, 491.
- Choanephora Cucubitarum*, 60.
- Chokam, *Andropogon Sorghum*, 107.
- Cholus forbesii*, 1008.
- Chortoglyphus gracilipes*, 781.
- Chremylus rubiginosus*, 108.
- Coryphalus hampei*, 978.
- Chrysanthemus*: *Tarsonemus pallidus*, a Mite Parasitic on Cyclamen and Other Plants in the United States, 983. *Chrysanthemus* attacked by *Pulvinaria* in Africa, 1009. By Coccidae of the Philippine Islands, 1253. By *Tarsonemus pallidus*, 1262.
- Chrysomphalus*: *C. aonidium* and *C.* spp., 607. *Chrysomphalus dictyospermi* attacked by *Prospaltella fasciata* n. sp., 110. On the So-Called Varieties of the Scale Insect *Chrysomphalus dictyospermi*: Injurious to Citrus Plants, 600. *Chrysomphalus minor* injurious to oranges in North Africa, 1252. Observations on the Coccidae of Europe, Africa and America, 977. Of British Guiana, 1100. Coccidae of the Philippine Islands, 1253.
- Chrysomyxa abietis*, 505.
- Chrysopa claveri*, 1100.
- Chrysophyllum argenteum*, 607.
- Chrysophyllum* sp., 976.
- Cicer arietinum* attacked by *Phylloticta cicerina*, 681.
- Cigarette beetle, 781.
- Cinchona: *Helopeltis* spp. injurious to Java, 614. Cinchona plantations, 978.
- Cinnamomum: Coccidae in the Seychelles Islands, 106. Coccidae of Porto Rico, 607. Diseases attacking Cinnamon Tree, 1161.
- Circaea lutea*, 383.
- Cirsium arvense*, 390.
- Cistus laurifolius*, 804.
- Citharexylum pruticosum*, 607.
- Citrus blast, 972.
- Citrus fruits: The Fruit Flies Occurring in India, Burma, and Ceylon, 107. Appropriations of the Federal Department of Agriculture of the United States, 214. *Citrus aurantium*, 590. List of the Coccidae of Porto Rico, 607. On the So-called Varieties of the Scale Insect *Chrysomphalus dictyospermi*: Injurious to Citrus Plants, 600. *Mesodactynium deltoe* n. sp., a Gall-forming Scale Insect observed upon Species of Citrus, 789. *Septobasidium albidum* on Citrus, 808. Insects Injurious to Cultivated Plants in North Africa, 1252. *Selenaspidium articulatus* on Citrus, 1253.
- Citrus Medica: Coccidae in Barbadoes, 608.
- Cladosporium acerinum* on Acer Negundo, 1233.
- Cladosporium herbarum*, 196.
- Clasterosporium carpophilum*, 381.
- Claviceps purpurea*, 1084.
- Cleistantra flavipes*, 1084.
- Cleonus* sp. observed in 1915 in Austria Hungary, 112.
- Clover: The Influence of Parasitic Fungi on the Clover Crop, 100. Host Plants of *Thielavia basicola*, 292. *Tetranichina abietalis* on white clover, 781. Enemy in Denmark,

1084. *Sitona lineata*, a Coleopteron Injurious to Leguminosae in Sweden, 1105.
- Clover mite, 1108.
- Clytus* (*Plagionotus*) *arcuatus*, a Coleopteron Injurious to the Oak in Germany, 698.
- Cnecorhinus exaratus*, 1084.
- Cnicus arvensis*, 390.
- Coccidoxenus coelops* and *C. obscuratus*, 392. *C. distinguendus* n. sp., 783.
- Coccoloba urticae*, 607.
- Coccophagus bogoriensis*, Koningsb., 507.
- Coccus*: *C. hesperidum*, 607. *C. manihotae*, 607. *C. tomentosus*, 976. *C. vitis*, 213. *Coccus* spp., 1253.
- Cocklebur, *Xanthium pennsylvanicum*, 704.
- Coco de mer, 106.
- Coconut: Coccidae observed in the Seychelles Islands, 106. Coccidae of Porto Rico, 607. *Aleurodicus destructor*, a Rhyncho Pests of the Coconut, in the Philippines, 605. *Rhynchophorus ferrugineus*, Coleopteron Injurious to the Coconut and other Palms in Ceylon, 600. *Pseudococcus nigræ*, 976. Diseases and Pests of Cultivated Plants in the Dutch Indies during 1919, 978. Coccidae in the Philippine Islands, 1253.
- Codium* sp., 607, 1009, 1100, 1253.
- Coelodes puliginosus* a Coleopteron Injurious to the Poppy in Austria, 694.
- Coffee: Diseases into Reunion, 30. *Coffea robusta*, 507. Root Diseases Due to *Rosellina* sp. in the Lesser Antilles, 500. Coccidae of Porto Rico, 607. Coccidae on the coffee-tree, 783. *Corticium salmonicolor* on the Coffee-tree, 808. *Hymenochaete novia* on the coffee-tree, 808. *Lecanium* spp. on the coffee-tree, 977. Diseases in the Dutch Indies, 978. *Ecrya migrascolata* on coffee, 1009.
- Colaspidea atra*, 1255.
- Coleosporium* spp., 971.
- Coleus* sp., 607.
- Collaria oleosa*, 786.
- Colletotrichum*: *C. cereale* on Wheat in Canada, 1232. *C. Lindemuthianum*, 381, 681. *C. oligochaetum*, 381.
- Columba oenas*, 1084.
- Columbia: On the Injury to Rice called "Hielo", in the Villavicencio Region, 207. On Some Rhyncho of Economic Importance from Colombia, 786.
- Compositae: Host Plants of *Thielavia basicola*, 292.
- Conchaspis angraei*, 607.
- Conchylis ambigua*, 881.
- Congo, Belgian: The Organisation of the Agricultural Department in the Belgian Congo, 177. Insects Injurious to the Cacao Plant in the Belgian Congo, 1107.
- Coniophora cerebella*, 967.
- Coniothyrium Dasylirii*, 681. *C. tirzense*, 809.
- Conotrachelus nemophar*, 109, 825.
- Contarinia tritici*, 692, 1084.
- Convolvulus hawk-moth, 1251.
- Copper: Preparations using copper as a basis against *Plasmopara viticola*, 194.
- Cordia* sp., 607, 976.
- Coriandrum sativum*, 1261.
- Cornus alba*, 964.
- Cotozo, *Acrocomia media*, 607.
- Corticium salmonicolor*, 808.
- Corticium* sp., 978.
- Corvus tingiberus*, 1084.
- Coryneum perniciosum*, 387, 973.
- Corypha elata*, 1253.
- Cotton: Diseases of cotton, 214. *Gossypium herbaceum* host plant of *Thielavia basicola*, 292. Disease Resisting Sea Island Cottons, in the United States, 593. Cotton attacked by *Choanophora Cucurbitarum*, 600. Coccidae of Porto Rico, 607. *Pectinophora gossypiella* (Pink Boll-

- worm) a Microlepidopteron Injurious to Cotton and *Pyroderces villosi* (Scavenger Bollworm) another Microlepidopteron which May Easily be Mistaken for the Former, 379. The Chief Insects Injurious to the Cotton Plant in the Punjab, India, 883. Cotton Plants as Green Manure: a Method of Controlling the Mite *Eriophyes gossypii* and the Scale Insect *Aspidiotus perniciosus* in the Island of St. Kitts, Lesser Antilles, 1102. Coccidae in the Philippine Islands, 1253.
- Cotton bollworm, 883.
- Coucida, 977.
- Courida, see *Arizema nitida*.
- Cowpea wilt, 684.
- Cranberry, 290.
- Crassiseta nigricaps*, 787.
- Crataegus Oxyacantha*, 788.
- Crematogaster* sp., 1009, 1100.
- Crescentia Cuete*, 607.
- Crinum giganteum*, 681.
- Crocotis asparagi*, 1253.
- Cristatithorax latiscapus* Gir., 507.
- Cronarium rubicola*, 601, 1246.
- Crotalaria striata*, 1259.
- Crotalaria usaramensis* resistant to insect attacks, 980.
- Croton humilis*, 607.
- Crucifers, cultivated: *Bacterium campestre* Injurious to Crucifers Cultivated in South Africa, 201. Insects and Other Enemies of Cultivated Plants in Ireland, 205. Host Plants of *Thielavia basicola*, 292. *Sclerotinia Matthiolae* n. sp. Parasitic on *Matthiola valesiaca* and other Cruciferae, in Switzerland, 778. Life History of *Plutella maculipennis*, the Diamond-Back Moth, 882. *Melizethes aeneus*, a Coleopteron Injurious to Cruciferae in Sweden, 1106.
- Cryphalus abietis*, 505.
- Cryptocerus atratus*, and *C. minutus*, 1100.
- Chrysobalanus pellocarpus*, 977.
- Chrysophlyctis endobacca*, 294.
- Ctenopsylla*, 396.
- Cucumis* attacked by *Chaetodacus* spp., 107.
- Cucumis salivus* attacked by *Chaetonephora Cucurbitarum*, 600.
- Cucurbita* spp. attacked by *Chaetodacus* spp., 107.
- Cucurbitaceae: Attacked by *Dacus brevistylus*, 107. Host Plants of *Thielavia basicola*, 292. *Chaetonephora Cucurbitarum*, a Phycomycete Parasite on *Cucurbita* spp. in North Carolina, United States, 600.
- Cucurbitaria Picene*, 505.
- Cumullit against *Plasmopara viticola*, 194.
- Curl of, the Potato, 198.
- Curly Dock, *Rumex crispus*, 701.
- Curly-leaf, 1231.
- Cutworms, 611.
- Cycas circinnalis*, 1253.
- Cycas revoluta*, 607.
- Cyclamens: *Tarsonemus* sp., a Mite Parasitic on Cyclamens in Ontario, Canada, 616. *Tarsonemus pallidus* a Mite Parasitic on Cyclamen and Other Plants in the United States, 983.
- "Cyclamen mite" 983.
- Cycloconium: *C. oleaginum* in Italy 381, 438.
- Cylindrosporium Brassicae*, 1084.
- Cymbidium Tracynum*, 608.
- Cyperaceae: Host Plants of *Thielavia basicola*, 292.
- Cyrtacanthacris nigricornis*, 510, 978, 985.
- Cyrtogaster occidentalis*, 785.
- Cystopus* spp., 380, 382, 581.
- Cytospora batata*, 598.
- Cytosporina ludibunda*, 680.
- DACETON ARMIGERUM, 1100.
- Dacus*, 785.
- Dactylis glomerata*, 1093.
- Dactylopius nipa*, 615.

- Diacylopius vitis*, 213.
genus: *D. oleae*, attacked, by *Eupelmus urozonus*, 115. *D. oleae* var. *astatica* n. var., 210. *D. oleae* in North Africa, 1252. *Dacus* spp., 979. The Fruit Flies Occurring in India, Burma and Ceylon, 107.
Delap, see *Erythrina*.
Delia variabilis, 681.
Delbergia latifolia, 978.
Deluca Filum on *Uromyces Polygalae*, 193.
Delirion acrotrichum, 681.
Delte Palm: Coccidae of Porto Rico, 1007. *Phoenix dactylifera* attacked by Coccidae in England, 977. Coccidae in the Philippine Islands, 1253.
Denmark: Fungi, Insects and Animals Injurious to Cultivated Plants, Observed in Denmark in 1916, 1084. *Aplanobacter Rathayi* Injurious to *Dactylis glomerata* in Denmark, 1093.
Desert corn flea-beetle, 613.
Diamond-back moth, 882.
Dianthus Caryophyllus attacked by *Septoria calycina*, 681.
Diaporthe spp., 964.
Diaspis: *D. echinocacti*, 607. *Prospaltella berlesii* against *D. pentagona*, 601. Coccidae observed in the Seychelles Islands, 106. Coccidae Observed in the Royal Botanic Gardens, Kew, England, 970.
Dibrachys spp., a Chalcid Parasitic of the Grain Weevil, 108.
Dilymella applanata, a Spheriaceae Parasite on the Raspberry in Switzerland, 779.
Dilammus fistulator, 985.
Dillenia philippinensis, 1253.
Dilephia graminis, 381.
Dinaspis annae n. sp., 608.
Diospyros Kaki, 1253.
Diplococcus Lymantriace, n. sp., 610.
Diplodia Traversiana, 681.
Diplodiella Goethiana, 681.
Diplosis sp., 1256.
Diplotaxis sp., 382.
Diseases due to Fungi, Bacteria and other Lower Plants: Observations on Plant Diseases carried out in 1915 at the Royal Institute of Cryptogamic Botany of Pavia, Italy, 381. A New Disease of Wheat, Probably of Bacterial Origin, 969. Fungi, Insects and Animals Injurious to Cultivated Plants Observed in Denmark in 1916, 1084. Plant Diseases Recently Observed for the First Time in Canada, 1232.
Diseases not due to parasites or of unknown origin: The noxious Action of Sea-salt deposited on Seashore Plants, 96. Tubercoid Lesions on Sunflower Roots in Italy, 180. On a Disease of the Banana in the Salayer Islands, 109. "False Blossom", a Disease of Cranberry (*Oxycoccus macrocarpus*) in the United States of America, 299. The defective Development of Walnut Shells in Austria, 291. A New Disease of Pelargoniums in Germany, 380. Effect of the Sirocco upon Tunisian Vineyards in July 1910, 490. Toxic Chlorosis of Maize, 491. Pea-Nut Mosaic, 492. Factors Determining the Occurrence of "Silver-Leaf" on trees, 775. Gummosis of the Sugar-Cane in Java, 902. The Treatment of Sugar Cane Cuttings with regard to Sereh Disease and Disease of the Phloem in Java, 903. Investigations on the Dying-out of Pepper-Vines in the Dutch-East-Indies, 1083. The Presence of Nitrites and Ammonia in Diseased Plants, 1088. Experiments on Potato Leaf Curl in France, 1229. New Disease of the Pineapple, 1230. The Little Leaf Disease of the Vine, 1231.
Djamoer ocpas, 978.
Dolichoderus bituberculatus, 507, 614.

- Colichodermis* sp., 1100, 1256, 1259.
Dothichiza populea, 1232.
 Dropping, Resistance to, 731.
Drosicha palavinica and *Drosicha* spp., 1253.
 Dry-rot, 1211.
 Dusky cotton bug, 883.
 Dutch-East-Indies: Diseases and Pests of Cultivated Plants during 1916, 978. Investigations on the Dying-out of Pepper-Vines in the Dutch-East-Indies, 1083. See also Java, Sumatra.
Dysdercus cingulatus, 883.
EARLAS INSULANA, 883.
Etaloma tuberculatum, 1100.
 Egg Plants: *Cassida palliata* ("Egg-plant Tortoise Beetle") Parasitic on the Eggplant and the Potato in Louisiana (U. S. A.), 207. Coccidae of Porto Rico, 607. The damage caused by *Aschochyta hortorum*, 680. New Japanese Fungi, 905.
 Eggs plant tortoise beetle, 297.
 Egypt: *Euzophera osseatella*, a Microlepidopteron Attacking Potatoes, in Egypt, 982.
Eichhornia crassipes, 1082.
Elachiptera nigripes, 787.
Elachista coffeella, 36.
Elaphrium Simariba, 607.
Elateridae: A New Remedy for the Successful Control of *Elateridae*, 111. Diseases and Pests of Sugar-beet observed in Austria-Hungary, 112.
 "Elm-galerucella" (*Galeruca luteola*) in Spain in 1917, 986.
Emex australis, a Queensland Weed, 204.
Empusa Fresenii, 607.
Endothia parasitica, 18, 99.
Endothia radialis, 973.
Entomophthora Phytonomi, 1084.
Entyloma hieronense, 681.
Ephialtes manifestator, 784.
Eriaporus laticeps, 783.
Erigeron linifolius, 614.
Eriobotrya japonica attacked by *Myrothoma Eriobotryae*, 681.
Eriodendron antracinosum, 1253.
Eriopellis testucae, 975.
Eriophyes gossypii, 1102.
Erlangea tomentosa, attacked by *Periclinia Erlangeae*, 193.
Eryngium maritimum, 96.
Erysiphe graminis, 381, 1084.
Erysiphe Polygoni, observed on the Clover crop in Russia, 199.
Erythrasis glauca, 977.
 Eritrea: *Scutellista gigantea* n. sp., Chalcid Parasite of the Coccid *Ceroplastes mimosae*, in Eritrea, 61.
 Chalcididae Living in the Fruits of Wild Fig-trees in Eritrea, 88.
 Fruit Flies (Sub-Genera *Eriua* and *Dacus*), observed in Eritrea, Nyasaland and Mauritius, 970.
Erythrina spp., 607, 614, 976, 977, 1083, 1100, 1260.
Erythropalum scandens, 1253.
 Escoba, 607.
Eucalymnus chelonoides, 977, 117.
Eucalyptus: Coccidae of Porto Rico, 607.
Eugenia: *E. calubcob*, 1253. *E. Jambolana*, attacked by the Fruit Fly, 107. *E. Jambos*, 607, 1253. *E. paccensis*, 977, 1253.
Eulecanium corni var. *robinianum* Hungary, 213.
Eulecanium persicae, in Hungary, 2.
Eumolus truncatipennis, 302.
Eumynus americanus attacked *Phomopsis* spp., 904.
Eumynus europaeus host of *Tenuum capreae*, 116. Factors Determining the Occurrence of "Sick Leaf" on Trees, 775.
Eupatorium odoratum, 607.
Eupelmus javae, 1259.
Eupelmus uragonus ectoparasitic of *Dacus oleae*, 115.
Euphorbia attacked by *Aspidiotus*, 976.

- Euphorbia Peplus*, 606. *E. sanguinea*, 607.
Eupristina spp., 391.
 European fruit Lecanium, 1101.
Eurydema oleracea, 1084.
Eurytoma caridei, 981.
Euscenion cornigerum, 783.
Euscenion pattersoni, 392.
Eutypa ludibunda, 686.
Eutypa Paulowniae, 995.
Eutypa ossatella a Microlepidopteron Attacking Potatoes in Egypt, 982.
Euspidiotus fimbriatus var. *cupensis*, 977.
Euxestria discolor, 976.
Euxestrus ormani, 1107.
FAGOPYRUM ESCULENTUM, attacked by *Selenotoma Fagopyri*, 965.
Fagus sylvatica, 382.
 False blossom, 290.
 False Ragweed, *Fraseria acanthi-carpa*, 701.
Ficus Silboana, 877.
Ficus zibethicus, 397.
Ficus: *F. laevigata*, 907. *F. nitida*, 607. *F. Sycomorus* attacked by *Ceratolepis arabicus* and *Synophaga sycomori*, 886. *Ficus* sp., 1253. *Ficus Carica*, see Fig.
 Fig: *Ficus* sp. attacked by the Fruit Flies, occurring in India, 107. *Botrytis cinerea* a Disease Attacking the Shoots and Fruit of Fig Trees in England, 202. Chalcididae of the Wild Fig-Tree in India, Ceylon and Java, 301. Coccidae of Porto Rico, 607. Chalcididae Living in the Fruits of Wild Fig-trees in Eritrea and Uganda, 886. *Ficus Carica* attacked by *Phomopsis* spp. in England, 961. *Phytophthora Melanogonia*, 965. Observations on British Coccidae, 975. Observations on the Coccidae of Europe, Africa and America, 977. *Aspidiotus crinaceous* on fig tree, 1090. The "Little Leaf" Disease of the Fig-tree in California, 1231.
Florinia spp., 1223.
Florinia hewensis, 976.
 Flat weed, 389.
 Flax: *Longiarus purculus* on the Flax in Ireland, 205.
 Flea seed, 605.
 Flies, The Fruit, 107, 979, 1252.
 Fly, Olive, 210, 1252.
 Forage Crops: Enemies in Denmark, 1084. *Aplanobacter Rathayi* Injurious to *Dactylis glomerata* in Denmark, 1093.
 Forestry: Experiments Made in Austria in Protecting Forest Trees from Injury by Game, 202. *Rhyssa persusaria* and *Ephialtes manifestator*, Hymenoptera useful to Forestry, 784. See also Pines, Oaks, Juniper, Larches, etc.
Forficula auricularia, 1084.
 Formalin against *Bacterium campestris* injurious to Crucifers, 201.
 France: The Phytopathological Inspection of Horticultural and Vine-Growing Establishments, 289. *Basillus Lymantriae*, *B. Liparis* n. sp. and *Diplococcus Lymantriae* n. sp., Parasites of the Larvae of the "Unlike Bombyx" (*Lymantria dispar*), in France, 610. Meigenia floridis, 1255.

- Melanconium Sacchari* the Cause of the "Rind Disease" of the Sugar Cane, 685.
Melastoma malabathricum, 614.
Melia Azedarach, 607.
Meligethes aeneus, 1106.
Meliola munda, 808.
Melzer, against *Plasmopara viticola*, 104.
Mellessis sphacroidalis and *M.* spp. on the Fruits in India, 107.
Melolontha vulgaris appeared in the Sudeten region in 1015, 112. In Denmark, 1-84.
 Melons: Attacked by *Fusarium nivale* and *Colletotrichum oligochaetum* in 1915 in Italy, 381. *Pseudoperonospora cubensis* on *Cucumis Melo*, 382. Variety resistant to Leaf spot, 824.
Mercurialis sp., 108.
Merulius lacrymans, 967.
Meslecanium deliae n. sp., 789.
Metamasius ruficornis n. sp. a Coleopteron Injurious to the Pineapple in Jamaica, 114.
Metarrhizium enemy of *Helopeltis*, 614.
Metarrhizium Anisopliae, 395, 509, 510.
Metasphaeria culmivora, 681.
Micrococcus Trilici, 381.
Microgaster glomeratus a Braconid observed on Wheat in Austria, 290.
Microbotium acaciaefolium attacked by *Acheres quinquefori*, 977.
 Micromycetes Injurious to Cacao, 502.
 Mildew: Comparative Tests of Remedies against Vine Mildew, 194. Silver Nucleinate, a Substitute for Copper Sulphate in the Control of Vine Mildew, 504. Resistance to Mildew, 731. Grain Mildew (*Sclerospora macrospora*) in the Government of Pololia, Russia, 872.
Milium multiflorum, 681.
Mimosa globosa, 977.
Mirabilis jalapa, 380.
Mischocarpus fuscescens, 1253.
 Mole: The natural enemy of *Agriotes obscurus*, 508.
Momordica Charantia, attacked by *Chaetodacus* spp., 107.
Monolimon spp., 786.
Monodora sp., 976.
Monophlebinae injurious to Tea Plantations, 113.
Monophlebus (?) *hirtus*, 1099.
Monophlebulus townsendi, 1253.
Moutidae enemy of *Helopeltis*, 614.
Morinda bracteata, 1253.
 Morocco: "Rust" of the Castor-Oil Plant (*Uredo Ricini*) in Morocco, 1245. Injurious insects, 1252.
 Mosaic, Pea-Nut, 192.
 Mungi-no-tachigare, 905.
 Mulberry: Coccidae of Porto Rico, 607. On the Causes of Root Rot of the Mulberry and Protective Measures in Piedmont, Italy, 686. New Japanese Fungi, 905.
 Mule Fat, *Baccharis cuneata*, 701.
Munkieella melastomata, 808.
Musa paradisiaca, see Bananas.
 Muscar-line, green, see *Metarrhizium Anisopliae*.
 Musquash, 397.
 Mussel Scale Insect, 394.
 Mustard attacked by *Plutella maculipennis*, 882.
 Mwange attacked by *Aspidopota nearei*, 1099.
Mycosphaerella hordeicola, 905.
Myrmica Rhacomia, 681.
Myriocnema conferei, Ashm., 597.
Myrceugenia planipes, 608.
Myrsine Duriei, 607, 868, 977.
Myrica Gale attacked by *Lecanosporeae*, 975.
Myristica fragrans, 1094.
Mytilaspis pomorum, 391.
NACOLEIA OCTASEMA dangerous to Bananas in Java, 211.
 Nanggung, 1256.
 Narcissus: A Disease of the Bulb.

- of *Narcissus* and of Other Plants in New South Wales, Australia, 602.
- Nasturtium sylvestris*, 382.
- Natal, *see* Africa.
- Nectria graminicola*, 1084.
- Neda dilychnis*, 1100.
- Neerunda aceroides*, attacked by *Phomopsis Libiseyi*, 964. Attacked by *Cladosporium acerinum*, 1233.
- "Négril of the lucerne", 1235.
- Neoromannia clusiae*, 501.
- Nephrolepis exaltata* var. *hastomiensis*, 607.
- Nerium Oleander*, 607.
- "Nerume" or "Marciume nero", the Black Rot of Chestnuts in Italy, 203.
- Nesophytis* sp., 613.
- Newfoundland: *Tortrix olivaceana* n. sp. a Microlepidopteron Injurious to Cabbages, 200.
- New South Wales: *Nicotiana glauca* a Rhynchote Pest of the Tomato, the French Bean and the Potato in New South Wales, 298. *Senecio clausus* and *Hypochaeris radicata*, Weeds of New South Wales, 380. A Disease of the Bulbs of *Narcissus* and of Other Plants in New South Wales, Australia, 602. *Fungharia Pectus* and *Aster subulatus* Weeds of New South Wales, 600. *Centauria distans* and *Salvia sessilis* Weeds of New South Wales, 689.
- Nerium aridula*, 298.
- Nicotine: The Use of Nicotine Sulphate as a Spray, 880.
- Nigeria, *see* Africa.
- Nispero, *Achnas Nispera*, 107, 607.
- "Nomi", 782.
- Norway: *Blutphaga pumila*, a Coleopteron Injurious to Barley, Beets and Potatoes in the Scandinavian Peninsula, 1104.
- Nolanea (Nolanea) clausena* a Microlepidopteron Injurious to the Banana in Java, 211.
- N. phallus curvis*, 781.
- *Nucleinate, silver, 594.
- Nyasaland, *see* Africa.
- Nymphaea: Helicosporium Nymphaeae* n. sp. a Hyphomycete Parasitic on *Nymphaea* in the United States, 603.
- OAK: Observations on the Oidium of the Oak, 494. Practical Means of Control of the "Oidium" of the Oak, 682. *Clytus (Plagionotus) arcuatus* a Coleopteron Injurious to the Oak in Germany, 698. *Quercus flex l. agrifolia* attacked by *Pestalozzia* spp., 877. The British Species of *Phomopsis*, 964. *Lecanum cilicium* on Oak, 975.
- Oat: Uspulun, a New Preparation for the Treatment of Cereal grains against Fungoid Diseases, 100. Oat Aphid (*Uphis avenae*), 205. Animal Injurious in Denmark, 1084. Mites Attacking Orchard and Field Crops in Utah, United States, 1108.
- "Oerchio di pavone" of Olive Trees, 381, 438.
- Ochna pumila*, 970.
- Odonaspis schizostachyi*, 1253.
- Oecophylla smaragdina*, 1250.
- Oerets, 510.
- Oiceticus platensis*, 981.
- Oidium: Observations on the Oidium of the Oak, 494. *Oidium leucocorymum*, 1247.
- Oidium of the Vine: Lime Sulphur Mixtures in the Control of the Oidium of the Vine, 498. Resistance to Oidium, 731.
- Oilpalm: Coccidae in the Seychelles Islands, 100. In the Belgian Congo, page 170.
- Okumikawa, 905.
- Olive: *Dacus oleae* attacked by *Eupelmus urozonus*, 115. The Olive Fly and One of its Parasites Recorded for the First Time in India, 210. *Cyclocentrum phaginum* and *Stictis Panzeri*, 381, 438. Experiments Made in

- Italy in order to Control the Un-productivity. 438. *Hendersonia Oleae*, 681. *Dacus oleae* in North Africa, 1252.

- Pithecolobium Saman*, 607, 1099.
- Placosphera Almédiana*, 681.
- Plagiolopus longipes*, 507, 1256.
- Plagiolopus arcuatus*, 608.
- Plantago major*, 382.
- Plantago Psyllum*, a New Weed in South Australia, 605.
- Plasmiodiophora Brassicae*, 1084.
- Plasmopara* spp., observed in Tuscany Italy, 382.
- Plasmopara viticola*, 194, 381, 504, 680.
- Platyleranium cribigerum*, 1253.
- Platysaissetia carpenteri* on Fig Tree, 977.
- Plectrodera scutator*, 301.
- Plectronia viridis*, 1253.
- Plectroscelis concinna*, on Sugar Beets in Ireland, 205.

- Pleospora graminea*, 1084.
Pleurotus radicosus n. sp., 808.
 Plum: *Aphis Pruni* on *Prunus* in Ireland, 205. Coccidae observed in Porto Rico, 607. Plum Diseases, 825. *Bacterium Pruni* Injurious to Peach and Plum Trees in the United States, 1096.
 Plum curculio, 109, 825.
Plumeria acutifolia, 507.
Plutella cruciferarum, injurious to cultivated Crucifers, 205, 1084.
Plutella maculipennis, injurious to *Brassica campestris* var. *Rapa* and to *Brassica campestris* var. *Rutabaga*, 205. On Cultivated Crucifers in the United States, 882.
 Put: *Entyloma hieromense*, 681.
Podospermum laciniatum, 780.
Puhaspis cycadæ, 976.
Ptychosis botani, 881.
Polygala persicarietfolia, 103.
Polygonum Persicaria, 671.
Polygonum aureum attacked by *Lecanium ligninum*, 975. Attacked by *Hemichionaspis aspidistrae*, 970.
Polyperus amorphus, 1250.
Polyperus sulphureus, 973.
 Romelos: *Citrus decumana* and the Fruit Flies Occurring in India, 107. Coccidae in the Philippine Islands, 1253.
 Rommarrosa, *Eugenia Jambos*, 607.
 Poppy: *Corliodes fuliginosus*, a Coleopteron Injurious to the Poppy in Austria, 693.
P. pulvis: *Plectrodera scalator*, a Coleopteron Injuring *Populus deltoides* and *Salix alba*, in the United States, 301. *Macrophoma Penzigii*, 981. *Lecanium zebrinum* on *Populus tremula*, 975. Little Leaf on *Populus monilifera* var. *angulata*, 1231. *Populus nigra* var. *italica* attacked by *Dolichium populea* Sacc., 1231.
 Porto-Rico: Coccidae of Porto Rico, 607.
 Portugal: Fungi of Portugal, 681.
Portulaca oleracea, 382.
 Potatoes: Diseases in Guatemala, 2. *Verticillium albo-atrum*, Causing the Verticillium Disease of the Potato in Ireland, 198. *Rhopalosiphum eri-lani*, *Bibio* sp., *Hydrocera micacea* attacking potatoes in Ireland, 205. *Eulecanium pomæ* var. *oblongarum* on potatoes, 213. Powdery seal of potato, 214. *Solanum nigrum* and *S. Dulcamara*, Host Plants of *Synchytrium endobioticum* (*Chytridium endobioticum*), in Great Britain, 204. *Cassida pallidula* Parasitic on the Egg Plant and the Potato in Louisiana, United States, 297. *Nematus maculata* a Rhynchote Pest of the Potato, in New South Wales, 208. Observations on Plant Diseases carried out in 1915 at the Royal Laboratory of Cryptogamic Botany of Pavia, Italy, 181. Potato Growing, 542. *Sphenotylethum atrocoens*, a Hyphomycete Parasitic on Potato Tubers New to Italy, 873. New Japanese Fungi, 695. Diseases and Pests in the Dutch East Indies, 978. *Euzophera ossi-nella* a Microlepidopteron Attacking Potatoes in Egypt, 982. Enemy in Denmark, 1084. *Blitophaga opaca*, a Coleopteron Injurious to Barley, Beets and Potatoes in the Scandinavian Peninsula, 1104. Experiments on Potato Leaf Curl in France, 1220. *Fusarium candelum*, the Cause of the Dry Rot of the Potato Tuber in the British Isles, 1241.
 Poverty Weed, *Ira axillaris*, 701.
 Pox, 598.
 Prevention and Control: Uspulen a New Preparation for the Treatment of Cereal Grains against Fungoid Diseases, 100. A New Remedy for the Successful Control of *Elatridæ*, 111. On Species of *Tripani-dæ* (Diptera), Genus *Carpomyia*,

- Injurious to the Fruits of *Zizyphus*, 115. Comparative Tests of Remedies against Vine Mildew (*Plasmopara viticola*) in Austria in 1916, 194. *Bacterium campestre* Injurious to Crucifers Cultivated in South Africa, 201. Tomaspis tristicus a Rhynchote Attacking Sugar Crops in Surinam, South America, 395.
Tomatoes: *Necara viridula*, a Rhynchote Pest of the Tomato, in New South Wales, 298. Observations on Plant Diseases carried out in 1915 at the Royal Institute of Cryptogamic Botany of Pavia, Italy, 381. Varieties resistant to wilt, 824. Damage caused by *Ascochyta horticola*, 680. New Japanese Fungi, 965. Mites Attacking Orchard and Field Crops in Utah, United States, 1108. *Fusarium coeruleum*, 1241.
Tonkin, see Indochina.
Torilis nodosa, 433.
Tortrix: *T. oleracea* n. sp., a Microlepidopteron Injurious to cabbages in Newfoundland, N. America, 209. *T. palana*, 1084. *T. strobilella*, 505. *T. tedella*, 505.
Tragocephala maynei, 1107.
Tragopogon sp., 382, 681.
Trameles radiciperda, 505.
Treculia sp., 976.

Troma micrantha, 607.
Trichocentrus gibbosus, 786.
Trichosanthes spp., attacked by *Chaetodacus*, spp., 107.
Tridacus d'ennerezi, 979.
Trigonella coerules, host Plant of *Thielavia basicola*, 292.
Triodonta procera, 1107.
Trislemma sp. attacked by *Puccinia necopina*, 193.
Triunifella semitriloba, 607.
Trogia Caryotae n. sp., 868.
Tropidocoris rufipes on the Apple in Ireland, 205.
Trypodendron lineatum, 505.
Tsuga canadensis, 1250.
Tulipa: *Rhizoglyphus echinopus*, *Iso-toma tenella*, *Hepialus* sp., injurious to *Tulipa*, 205. *Sclerotium Tulipae*, 1086.
Tunis: Effect of the Sirocco upon Tunisian Vineyards, 490. Insects Injurious, 1252.
Turnip, 201, 882.
Tussock Moth, 782.
Tylenchus devastatrix, 1084.
Tyroglyphus sacchari, 781.

UGANDA, see Africa.

Umbrelliferae: Host Plants of *Thielavia basicola*, 292.

United States. *Puccinia glumarum* on Wheat in Salt Lake Valley, Utah, 101. Appropriations of the Federal Department of Agriculture of the United States for the Fiscal Year Ending June 30, 1917, 214. "False Blossom", a Disease of Cranberry (*Oxycoccus macrocarpus*) in the United States of America, 290. *Cassida pallidula* Parasitic on the Egg-plant and the Potato in Louisiana, 297. *Gymnonyctus californicus*, injurious to the Leaves of the Pear Tree, 299. *Laspeyresia molesta*, an Important New Insect Enemy of the Peach and of Other Fruit Trees in the United States, 300. *Plectro-*

dera sculator, a Coleopteron injuring *Populus deltoides* and *Salix alba*, in the United States, 301. Credits Allocated in 1916-17 for the Control of Diseases and Pests of Plants in the United States, 379. The Selection of Sea Island Cotton (*Gossypium barbadense*) in the United States, 536. Sweet Potato Culture, 543. *Choanephora Cucurbitarum*, a Phycomycete Parasitic on *Cucurbita* spp. in North Carolina, 600. *Helicosporium Nymphacarum* n. sp., a Hyphomycete Parasitic on Nymphæa in the United States, 603. *Xylaria* sp., the Cause of Root-Rot of the Apple in Virginia, United States of America, 604. *Chaetocnema cetypa* ("the desert corn flea-beetle") a Coleopteron Parasitic on Cultivated Gramineae and Lucerne, in the United States, 613. *Fusarium tracheophilum* Parasitic on Soy-Bean (*Glycine max*) in North Carolina, 681. New Mites, mostly Economic (Arachnidae), 781. *Ceratomyza femoralis* ("Wheat-sheath Miner"), a Dipterous Pest of Wheat, 785. The Horse-Radish Flea-Beetle (*Phyllotreta armoraciae* Koch); its Life History and Distribution, 787. Notes on the Black Apple Leaf Hopper (*Heterocerus filici* Van D.), 788. Plum-Growing at the Maryland Agricultural Experiment Station, 825. Disease Resistant Market-Garden Plants in Maryland, 870. *Bacterium Phaseoli*, Injurious to Field Beans in Michigan, United States, 874. *Xylaria* sp., the Cause of Root Rot in Apple Trees in North Carolina, United States, 875. Life History of *Plutella maculipennis*, the Diamond-Back Moth, 881. *Schizura ipomoeae*, a Macrolepidopteron Parasitic on Rose Bushes and Pecan Trees in Louisiana, United States, 884. *Phenacoccus peltiti* n. sp., 2

- Scale Insect Observed on Several Useful Plants in Missouri and Kansas, United States, 885. *Agrilus burkei* n. sp., a Coleopteron Parasitic on *Alnus rhombifolia* and *A. tenuifolia* in California, 887. A New Disease of Wheat, Probably of Bacterial Origin, 969. *Septoria Persicariae* n. sp., a New Leaf-Spot Disease of *Polygonum Persicaria* in Utah, United States, 971. *Bacterium citrarejaciens*, sp. nov., the Cause of the Disease on Orange and Lemon Trees Known as "Citrus Blast" in California, 972. New Species of *Peridermium* on *Pinus* in the United States, 974. *Tarsonemus pallidus*, a Mite Parasitic on Cyclamen and Other Plants in the United States, 983. *Bacterium Pruni*, Injurious to Peach and Plum Trees in the United States, 1096. Undesirable Insects Which Have Recently Been Introduced into New Jersey, United States, 1098. Observations on the Coccids, *Lecanium corni* and *Physokermes piceae*, in Wisconsin, United States, 1101. Mites Attacking Orchard and Field Crops in Utah, United States, 1108. Two New Dipterous Cambium Miners, 1109. The Handling and Storage of Apples in the Pacific North West, 1227. The "Little Leaf" Disease of the Vine in California, 1231. Fungi of North Dakota, United States of America, 1234. *Bacterium Tabacum* Injurious to Tobacco in North Carolina, United States of America, 1244. The Discovery of Uredinae of *Cronartium ribicola* on Stems of *Ribes hirtellum* in Maine, United States, 1246. *Polyporus amorphus*, Causing a Rot of the Wood of *Pinus rigida*, in Pennsylvania, U. S. A., 1250. *Tarsonemus pallidus*, a Mite Injurious to Geraniums and Other
- *Plants in Maryland, U. S. A., 1262.
- Uredinaceae: New Uredinaceae in East Africa, 193. Change of Host of the Uredinaceae *Thecopsora sparsa* and *Pucciniastrum Circaeae*, 383.
- Uredo Ricini*, 1245.
- Urena lobata*, 607.
- Uromyces* Poe., 1084. *U. Polygalae*, 193. *U. Trifolii*, 199.
- Urtica urens*, 382.
- Uruguay: Invasions of Locusts in Uruguay, 699.
- Uspulun a New Preparation for Treatment of Cereal Grains against Fungoid Diseases, 100.
- Ustilago*: *U. Avenae*, 100. 1984. *U. nuda* in Denmark, 1084. *U. nuda* and *U. Tritici* Observed Respectively on Barley and Wheat in Java, 970. The Influence on Germination of the Hot Water Treatment of Cereal Seeds for Smut, 533.
- Ustilina zonata*, 1085.
- Uvero, 607.
- VALERIANOIDES JAMAICENSIS**, 607.
- Valsa Paulowniae*, 905.
- Venturia inaequalis*, 1087.
- Venturia P. m.*, 1227.
- Verberna*, *Valerianoides jamaicensis*, 607.
- Veronica serpyllifolia*, 382.
- Verticillium albobarrum*, injurious to Potato in Ireland, 108.
- Verticillium* disease of the potato, 108.
- Viburnum Tinus*: "Silver Leaf", 775.
- Vicia* spp., 382.
- Vigna: *V. sinensis* Host Plant of *Thielavia basicola*, 202. *V. sinensis* attacked by *Fusarium trackeipkium*, 684.
- Villebrunea rubescens*, 614.
- Vine: Comparative Tests of Remedies against Vine Mildew in Austria

- in 1916, 194. Scale Insects as Vine Pests and their Relationships with other Cultivated Plants, 213. Observations on Plant Diseases carried out in 1915 at the Royal Laboratory of Cryptogamic Botany of Pavia, Italy, 381. Effect of the Sirocco upon Tunisian Vineyards in July 1916, 490. Lime-Sulphur Mixtures in the Control of the Oidium of the Vine, 498. Parasites of the Vine and Scots Pine respectively in Switzerland, 504. Silver Nucleate, a Substitute for Copper Sulphate in the Control of Vine Mildew, 594. *Plasmopara viticola* in Italy, 680. Observations on the Vine Phylloxera in Bulgaria, 697. The Number of Races of Vine Phylloxera, 878. Experiments on the Control of Eudemis and Cochyliis, 881. Observations on some Direct Bearers, 1026. Coccidiae of British Guiana, 1100. Table Grape Hybrid Bearers, 1169. Hybrid Direct Bearers, 1170. The Malone Vine in the Department of Aude, France, 1171. The Little Leaf Disease of the Vine in California, 1231. Insects Injurious to cultivated Plants in North Africa, 1252. Coccidiae of the Philippine Islands, 1253. Disease of Bacterial Origin Observed in *Sparganopsis pulleriana* in France, 1254. *Vinsonia* : *V. personata* attacked by *Cerapterocerus pattersoni*, 392. *V. stellifera*, 976. Coccidiae observed in Seychelles Islands, 106. Coccidiae of Porto Rico, 607.
- Violaceae : Host Plants of *Thielavia basicola*. *Vitis*, sp. attacked by *Chaetodacus* spp., 107.
- Voacanga globosa*, 1253.
- Voles : The Control of Field Voles in Italy, 396. Diseases and Pests of Cultivated Plants in the Dutch Indies, 978. *Arvicola agrestis* and *Talpa europaea* in Denmark, 1084.
- WALANG SANGIT, 978.
- Walnut : The Defective Development of Walnut Shells in Austria, 291. *Juglans regia* attacked by *Phomopsis* spp., 964. Little Leaf in California, 1231. *Armillaria mellea*, a Basidiomycete Injurious to the Walnut Tree, in France, 1249.
- War-worms, 982.
- Wart disease, 294.
- Water cress, 882.
- Water hyacinth, 1082.
- Weeds : *Emex australis*, a Queensland Weed, 204. *Gomphocarpus fruticosus* and *G. physocarpus*, Naturalised Weeds in Queensland (Australia), 295. *Sida acuta*, a Weed of Queensland, Australia, 388. *Seneciois oleraceus* and *Hypochoeris radicata*, Weeds of New South Wales, 389. The Means for Controlling *Cirsium arvense* (*Cnicus arvensis*), 399. Experiments in Germany on the Determination and Yield of Red Clover from Various Sources, 433. *Plantago Psyllium*, a New Weed in South Australia, 605. *Euphorbia Peplus* and *Aster subulatus*, Weeds of New South Wales, 606. The Effect of Weeds upon Cereals, 625. Observations on the Cause of the Noxious Effect of Weeds, 688. *Centaurea solstitialis* and *Solidago sessilis*, Weeds of New South Wales, 689. The Relation of Farm Weeds to Hay Fever, 704. *Scorzonera laciniata*, a New Weed in Southern Australia, 780. Impurities of the seed of wild white clover, 814. An Act to Eradicate *Eichhornia crassipes*, a Troublesome Weed in Burma, India, 1082.
- Weissfleckigkeit der Blätter, 380.
- Weisspunktkrankheit der Blätter, 380.
- Western Elder, *Iva axillaris*, 701.
- Western Mugwort, *Artemisia heterophylla*, 701.

- Western Ragweed, *Ambrosia psilostachya*, 701.
- Wheat: "Uspulun", a New Preparation for the Treatment of cereal Grains against Fungoid Diseases, 100. *Puccinia glumarum* on Wheat in Salt Lake Valley Utah, U. S. A. 101. On a species of *Dibrachys*, a Chalcid Parasite of the "Grain Weevil" (*Calandra granaria*), 108. On the Spotting ("Puntatura") of Wheat Grains, 196. *Microgaster glomeratus*, a Braconid Observed on Wheat, in Austria, 296. Observations on Plant Diseases in 1915, Italy, 381. The Importance of the Awns of Native Wheat, 430. Variety of wheat resistant to rust, 541, 1146, 1147. The Appearance of *Puccinia glumarum* (Yellow Rust) on Wheat in 1914 and 1916 in Germany, 597. *Contarinia tritici* injurious in Sweden, 692. *Ceratomyza femoralis* ("Wheat-sheath Miner"), a Dipterous Pest of Wheat, 785. *Sclerospora microspora*, 875. New Japanese Fungi, 905. A New Disease of Wheat, Probably of Bacterial Origin, 969. *Ustilago nuda* and *U. Tritici*, Observed Respectively on Barley and Wheat in Java, 970. The Attack of immune wheat plants by rust, 1010. The diseases to which Wheat is subject in the Argentine, 1010. Diseases observed in Denmark, 1081. Fungous Diseases of Wheat, in the Argentine, 1092. Animal Pests of Wheat, in the Argentine, 1103. Mites injurious in the United States, 1108. *Conto-trichum cereale* in Canada, 1232.
- Wheat-sheath miner, 785.
- Wild fire, 1244.
- Willistonina exuriens* a Tachinid Parasite of the Lepidopteron *Automeris janus* in the Island of Trinidad, Antillas, 1257.
- Wind: Effect of the Sirocco upon Tunisian Vineyards, 490.
- Wire worms, 508.
- Witania organifolia*, 1253.
- Wolffiella ruforum*, 393.
- Wormseed, *Chenopodium anthelminticum*, 701.
- XANTHIUM PENNSYLVANICUM**, 705.
- Xanthosoma sagittifolium*, 1253.
- Xylaria* sp. the Cause of Root-Rot of the Apple in the United States, 601, 875.
- Xyleborus coffeae*, 978.
- Xylotripes gideon*, 985.
- YELLOW HEADED CACIQUE**, 1263.
- Yellow-leaf, 1231.
- Yerba mora, *Solanum nigrum*, 607.
- Yerba rosario, *Aeschynomene sensitiva*, 607.
- Yerba de San Martin, 07.
- ZAMIA INTEGRIFOLIA**, 607.
- Zinc paste against *Plasmopara viticola*, 104.
- Zizyphus*: On Species of Tripanidae (Diptera) Genus *Carpomyia* Injurious to the Fruits of *Zizyphus*, 115.
- Zukala*, spp., 965.

V. — WEIGHTS, MEASURES AND MONEY OF THE \$ COUN-
TRIES WITH THEIR ENGLISH EQUIVAL.

Archine (Russia)	=	27.99961 inches
Ardeb (Egypt)	=	5.44435 bushels
Ardeb of wheat (Egypt)	=	2.95264 cwt.
1 Ardeb of hulled maize (Egypt)	=	2.75580 cwt.
1 Ardeb of barley (Egypt)	=	2.36211 cwt.
1 Ardeb of undecorticated rice (Egypt)	=	5.72812 cwt.
1 Ardeb of decorticated rice (Egypt)	=	3.83813 cwt.
1 Arpent (Canada)	=	0.84501 acre
1 Are [100 square metres]	=	107.63915 square feet
1 Arroba (Brazil)	=	33.06951 lbs.
1 Arroba (Cuba, Guatemala, Paraguay, Peru)	=	25.35841 lbs.
1 Arroba (Mexico)	=	25.36677 lbs.
1 Bale of cotton (Brazil)	=	396.83415 lbs.
1 Bale of cotton (United States)	=	4.46431 cwt. (gross wt.)
1 " " " "	=	4.26788 cwt. (net wt.)
1 Bale of cotton (India)	=	3.57145 cwt.
1 Barrel of wheat flour (Canada, United States)	=	1.75001 cwt.
1 Bar, see Millier		
1 Bow (Java, Dutch Indies)	=	76.36998 square feet
1 Bushel (United States)	=	0.96896 bushels
1 Bushel of oats (United States)	=	32 lbs.
1 Bushel of oats (Canada)	=	34 lbs.
1 Bushel of wheat and potatoes (United States)	=	60 lbs.
1 Bushel of barley (Canada, United States)	=	48 lbs.
1 Bushel of raw rice (United States)	=	45 lbs.
1 Bushel of rye, hulled maize, linseed (Canada, United States)	=	56 lbs.
1 Cadastral arpent (Hungary)	=	1.42201 acres
1 Cental (United States)	=	100 lbs.
1 Centiare [10 square metres]	=	10.76392 square feet
1 Centigramme	=	0.15432 grains
1 Centilitre	=	0.0022 gallons
1 Centimetre	=	0.393715 inches
1 Centistere	=	0.35315 cubic feet
1 Centner (Germany, Austria, Denmark)	=	110.23171 lbs.
